

This bird list of Zimanga's 440 species was compiled using 25 years worth of observation, from amateur enthusiasts to professional ornithologists and, of course, reserve staff and their daily observations.

Some migratory species are not around all-year, and some species only pass by occasionally but there is most likely in excess of 300 species present in the reserve throughout any given time of the year.

This list makes use of the latest universally standardized nomenclature.

Good luck and happy birding
